

Synchronize payment and billing of shipments – all in one place.

Simplify the Freight Payment Process

Cirrus TMS streamlines time-consuming accounting tasks so you can focus on growing your business.

Cirrus TMS delivers an automated, seamless synchronization of all accounting procedures. By electronically connecting with your carriers, you can automate your freight audit and payment process and improve carrier relationships by reducing the payment cycle time. Integrate directly with leading payroll and bill pay applications on the market – like QuickBooks® – and make your accounting department more efficient overnight.

These functionalities provide huge time-saving benefits for your business:

Freight Settlements
Automatically pay matched invoices, eliminate duplicate charges and flag discrepancies

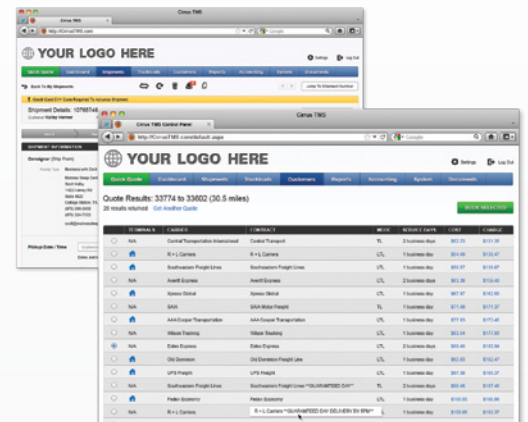

Reconcile Invoices
Match carrier invoices to the amount charged for each shipment

Enhanced Reporting
Analyze your transportation spend with real time reports

Simple Integration
No installation required and easy to integrate with your existing business software

Expert Support
Our support team helps you get started and customize your setup

Secure Data
Your information is data-encrypted so it stays safe and secure online

- ✔ Don't pay twice for freight – identify and flag duplicate invoices
- ✔ Reduce freight payment costs by 3-6% by eliminating erroneous charges or overpayment
- ✔ Improve carrier relationships with fast settlements and paperless invoicing
- ✔ Analyze your spend by allocating costs to specific departments or areas of your operation
- ✔ Review and export reports for billing adjustments, charged shipments and paid shipments
