

Manage Your Transportation Needs from the Cloud

Cut costs and save time with a better view of your freight

FREIGHT PLANNING AT YOUR FINGERTIPS. Cirrus TMS packs the power of desktop software with the usability and simplicity of a cloud-based transportation management system. This easy-to-use system goes where you want to go by offering fully customizable features that are tailored to any business that ships LTL or truckload freight.

Designed to save you time and money, Cirrus TMS outperforms other systems on the market because it adapts to the way you manage freight, not the other way around. Cirrus TMS is truly built with your business in mind.

- Manage carrier data & freight requirements
- Complete truckload brokerage management
- Instant and manual rating options
- Tender and trace shipments
- Automate freight settlements
- Integrate current accounting software
- Manage customer & user information

Unlike other systems out there. Our software is truly different.

Not all software is created equal. That is why Cirrus TMS is designed with flexibility in mind. We want your business to grow and you should have software that helps you every step of the way. We understand that switching systems can be daunting so we built Cirrus to seamlessly integrate with other important software you currently use. While we were at it, we made sure to include a few extras to make your experience even better.

Carrier Management
Store carrier information to eliminate repetitive data entry

System Customizations
Configure new reports and custom dashboards

Accounting Capabilities
Seamlessly link with QuickBooks®

Email & Text Alerts
Stay in constant contact with your customers

Multi-Carrier Rating & Quoting
Compare multiple freight rates across all modes

Flexible Contract Licensing
Annual contracts and low maintenance requirements

Focus on moving freight while we focus on technology.

From initial integration to monthly scheduled maintenance, we are with you every step of the way to ensure you get the most out of your system.

Save time and money right away. Cirrus TMS requires minimal to no training to get started so you quickly begin to reap the benefits. Best of all, Cirrus is built with open source technology so you never have to worry about outgrowing your system – just add on services as you see fit.

Once the system is fully implemented, you'll notice a huge difference in how your business operates. Take advantage of the ability to process more shipments, save valuable time and cut costs on your total transportation spend.

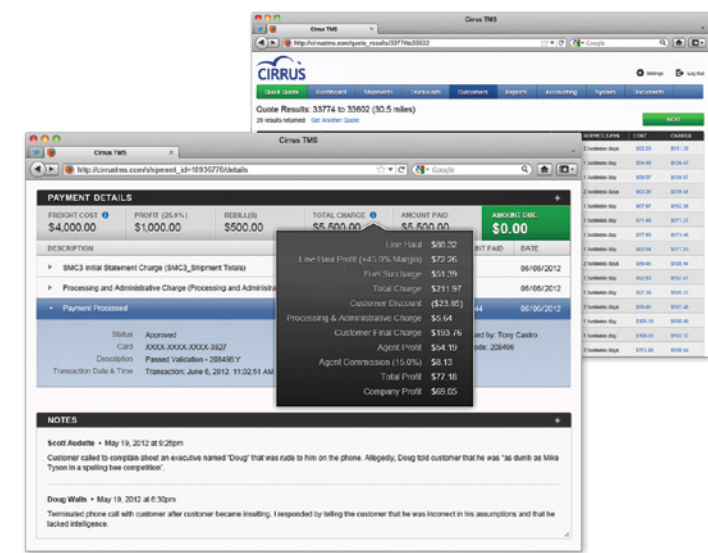

MORE THAN A ONE SIZE FITS ALL SOLUTION. Some businesses require more advanced functions that other systems do not offer. That's why we built Cirrus TMS with flexibility and scalability in mind.

As your business grows, Cirrus TMS grows with you. Our most popular add-ons are listed below, but our team can also customize and design a module that is just for you.

- Advanced Reporting and Forecasting
- Sales Team Management
- Marketing and Customer Follow-up
- Small Parcel Services

We go to great lengths to make sure you are 100% satisfied with Cirrus TMS. Don't see a feature or module you need? Just let us know and we will completely custom tailor a system for your company.
