

The key to your own results-driven 3PL or freight brokerage.

Brokerage Solutions for Rapid Growth

Cirrus TMS lets you manage carrier contracts, freight agents and shippers with one easy to use application.

Replace time-wasting manual procedures with affordable web-based technology that automates day-to-day transportation operations. Designed to handle a broad scope of functionality, Cirrus TMS executes every aspect of freight planning across all major modes.

Carrier Management

Maintain carrier data, rates, insurance, service areas, equipment and carrier restrictions, and edit data online, import or offer web portal access

Accounting Capabilities

Automatically pay matched invoices, eliminate duplicate charges and flag discrepancies, as well as integrate with payroll or billing software

Shipment Processing

Run multiple rate quotes, select accessorials, schedule appointments, dispatch drivers, generate required paperwork and track shipments

Shipper Management

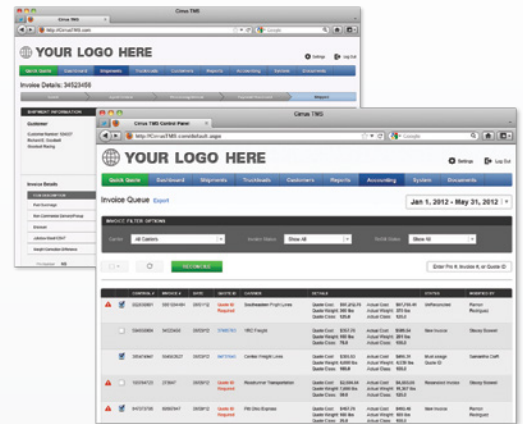

Shippers can self-manage their quotes and bookings online or freight agents can process orders and electronically communicate with shippers

Agent Performance

Monitor sales performance by user, team or department, and control visibility and permission levels based on the type of user

Simple Integration

From sales to implementation to support, our experts customize the system until you are 100% satisfied with the results

- ✓ Get LTL rates via EDI or API and post to load boards for truckload bids
- ✓ Easy to use dashboard simplifies processes for customers
- ✓ Consolidate LTL shipments for lower pricing and allocate costs
- ✓ Review and export reports based on sales and carrier performance
- ✓ Affordable software licenses remove the risk of investment
- ✓ Support team helps you get started, customize your setup and more
